APPENDAGE NO. 2 (Item No. 12)

The water rights in this application were shown in the Truckee River Final Decree as being owned by Antonio Raffetto for Claim Numbers 292 and 140, and by I. M. Lewis for Claim Number 342. Antonio Raffetto in turn conveyed portions of these rights to his son, J. L. Raffetto, who then sold to Joe Capurro. J. L. Raffetto also had purchased the property listed under Claim Number 342 in the name of I. M. Lewis and subsequently transferred water from this land to the Highland Ditch as indicated by the State Engineer's approval of Application Number 11009.

APPENDAGE NO. 3 (Item No. 13)

Water applied for herein is to be transferred from its present place of use and diverted through the Last Chance Ditch to the indicated proposed places of use. It will be necessary to construct an extension of the Last Chance Ditch as indicated approximately on the accompanying map. This extension will be about three miles in length and of sufficient size to carry about 12 c.f.s. Agreements are now being made between Louis Damonte and certain property holders who now receive water through the Steamboat Canal but who could also irrigate their lands through the Last Chance Ditch System whereby he will supply them their water through the Last Chance Ditch for an equal amount in the Steamboat Canal. In that event an extension will be constructed from the Steamboat Canal eastward across the Reno-Carson Highway and the W. & T. R. R. r/w to what is known as the Chandler Ditch. From this system in connection with the Last Chance Ditch extension it will enable the indicated lands to receive water.

APPENDAGE NO. 4 (Item No. 14)

It is estimated that the total cost of the works will be about \$35,500.00 which price includes the cost of the purchased water rights and ditches.
